Sample collection methods (PRO.S.106) and measurement of uncertainty (MU) are available upon request. MU is not considered when evaluating conformity, except for 9-THC concentrations in hemp samples. Cannabinoids measured by HPLC-UV OR UHPLC (TM 111). Terpenes measured by GCMS (TM 102). Microbes measured by culture-based methods (TM 101, TM 103, TM 112, TM 117, TM 118, TM 119). Mycotoxins and pesticides measured by LCMS (TM 100). Heavy Metals measured by ICPMS (TM 104). Water Activity measured by water activity meter (TM 106); moisture content by Loss on Drying (105). Unless otherwise indicated, results were reviewed and verified by the Lab Director, and issuance of this CoA was authorized by the Lab Director. Action limits set according to current version of MCA Technical Authority for Medical Cannabis Testing. Results valid only for the exact material sampled and analyzed. Specimens stored in a cool, dry place if not analyzed immediately. **Abbreviation Key: ND = Not Detected, LOD = Limit of Detection, LOQ = Limit of Quantitation, ppb = parts per billion, ppm = parts per million, UOM = unit of measure, NEG = Negative. **Total Potential THC/CBD is calculated using the following formulas to take into account the loss of a carboxly group during decarboxylation step. Total THC= THCa * 0.877 + D9-THC; Total CBD = CBDa * 0.877 + CBD** ISO/IEC 17025:2017 CERT #5470.01, 5470.05
